MIFTAH FAUZI

Fullstack Web Developer

Bandung, Indonesia | +62 821-1870-3834 | miftahfauzi012@gmail.com | github.com/miftt | linkedin.com/in/miftah-fauzi

SUMMARY

Informatics Engineering graduate from Universitas Pasundan (GPA 3.47/4.00) with an internship at PT Telkom Indonesia and a teaching assistantship. Focused on Laravel backends and React/TypeScript frontends: building APIs, modelling data, and handling job queues and authentication. Works in weekly sprints and ships features to production.

WORK EXPERIENCE

Fullstack Developer (Intern)

Jul-Sep 2025

PT Telkom Indonesia (Persero) Tbk, Digital Life & Collaboration, Bandung

- Rebuilt TGCast, Telkom's internal email broadcast platform, from a CodeIgniter monolith to Laravel 12, React 19 and TypeScript, in a 4-person team on weekly sprints.
- Moved email delivery onto queue workers, so broadcasts to 10,000+ recipients run in batches instead of blocking the request.
- Built the broadcast module: message composition, scheduling, per-recipient logs and delivery status.
- Added MFA Trust at login and a revoke-session screen where Super Admins see every active session and can revoke one or all of them, with an audit trail.

Teaching Assistant

Oct 2023-Feb 2024

Universitas Pasundan, Bandung

- Supported the Internet and Web Technology course: delivered material, ran class discussions and debugged student code.
- Graded assignments for 60+ students and gave individual feedback.

EDUCATION

S1 Teknik Informatika (Bachelor of Informatics Engineering)

Oct 2022-Jun 2026

Universitas Pasundan, Bandung (GPA 3.47/4.00)

- Best student in the Web Programming course, semester 2 (2023).

PROJECTS

GAIIA: Shoe E-Commerce

2025

Kotlin (Android), Next.js 15, TypeScript, Supabase | github.com/miftt/gaiia-api

- E-commerce API with endpoints for products, categories, brands, carts and customers, backed by Supabase.
- Customer registration and login with bcrypt hashing, consumed by an Android app in Kotlin for catalogue, purchase and transaction history.

Deadlix: Film Streaming Site

2024

Laravel, Inertia.js, React 18, TypeScript | github.com/miftt/deadlix_tubespw

- Film catalogue with Google sign-in (OAuth), an admin panel for users, and management of film entries with their artwork.
- React 18 + TypeScript frontend through Inertia.js, sharing one routing and data layer with the Laravel backend instead of a separate API.

WatchVerse: Streaming on a Go API 2025

Go, React, TypeScript, JWT | github.com/miftt/watchverse-go

- Layered Go API (config, handlers, models, middleware) with JWT authentication serving film, series and anime data.
- Separate React frontend consuming that API, built to compare a Go backend against the Laravel approach used in other projects.

E-Waste: Electronic Waste Admin Panel 2024

Next.js 14, TypeScript, Firebase, Recharts | github.com/miftt/e-waste

- Admin dashboard for resident and courier registrations, e-waste types and dropboxes, with its own API routes per entity.
- Collection charts and registration statistics by user type built with Recharts, data stored in Firebase.

CERTIFICATIONS & TRAINING

Wadhwani Foundation | Employability Skills (Bahasa) | Jun 2026

10 microcertificates: Professionalism, Self-Presentation, Impactful Writing, Self-Management, Customer Centricity, Online Communication & Data Security, Effective Speaking & Listening, Work Productivity Tools, Problem Solving & Innovation, Interpersonal Skills.

Internship Certificate | PT Telkom Indonesia (Persero) Tbk, Digital Life & Collaboration | 2025

SKILLS

Languages: JavaScript, TypeScript, PHP, Go, SQL, Kotlin, Java (academic), HTML5, CSS3

Frontend: React (18/19), Next.js (14/15), Inertia.js, Tailwind CSS, Bootstrap, Radix UI, Vite, responsive web

Backend: Laravel (up to v12), Node.js, Express, REST API, JWT, Google OAuth, queue workers, bcrypt

Databases: MySQL, PostgreSQL (Supabase), Firebase, schema design and relations, ERD

DevOps & Tools: Git, GitHub, GitLab CI, Docker, AWS S3, Vercel, Postman

Working Practices: Agile, Scrum, code review, debugging, technical documentation

Spoken Languages: Indonesian (native) | English (professional working proficiency: read and write technical documentation daily, comfortable in work conversations)
